M.A.F.C.A. ORANGE COUNTY CHAPTER

Mar. 1964

MEETING

It's meeting time again everybody.

TIME: 7:30 PM
PLACE: Izaak Walton Club House
1714 Santa Clara, Santa Ana
DATE: Thursday, March 12th, 1964

ECHOES OF FEB. 13TH MEETING

President Joe Eatherton Sr. and the Board, dug down and mustered up a fine program for that evening.

High point of this evening came of course when Roger "Zenith" Clements delivered a talk on the model 'A' carburetor, which was liberally sprinkled with inadvertent comedy. But aside from comedy, this tutorial lecture taught many of us a thing or two about carburetion, the Zenith in particular. Our appreciation to Roger is felt especially because his time is limited, since he leaves in early march for more jet training, U.S.M.C.

Rudy Perez gave us some interesting "Back of the barn" information on a '30 pick-up he has spotted. Also he passed around, for all to see, his fathers tire pressure gauge, a rare one with the original model 'A' Ford inscription on the face.

Craig Linville who is pioneering a new antique auto publication for this area, gave a rundown on what they hope to accomplish. It'll be called the 'Swap Meet Monthly', and will start publication soon.

RESTORER GOOF?

Some mixup seems to be evident with our national club in regards to subscriptions to the Restorer. This lack of competence on national's part should be looked into, since some chicanery of this sort has happened to several of us last year, without being resolved.

POKER RUN MARCH 22

Yep there's a poker run a brewin. And since we haven't had one of these to date, (unless you consider the fiasco we had a couple of years ago) we are going to put one on march 22, sunday. Bill Vaughn and Andy Baudino are at helm for this event and they say they hope to have a picnic at the finish of the run. The entry fee per car is 1.00 Let's all turn out for this event and possibly win trophies or prizes.

YUMA TOUR

After receiving a grand letter from Model 'A' Restorers of Arizona, and after hearing of the rousing time had by all who went last year, I'm sure we're all going to try to go. As you doubtless have heard it takes place on the weekend of April 11-12. The meet will again be held at the Stardust Hotel, and we club members are extended the courtesy of reduced room rates. So if you plan to attend you'd best make reservations now. Also you must register in order to be eligible for dash emblems, trophies, and banquet priveleges. Fee \$3.00

Some of the gang who already are planning on this trek are, the Howells, Dierbergers, Robinsons Scotts, Jones's Ferris, Meadors Twymans. Attend the meeting march 12, we hope to have Jack Dierberger's slides pertaining to last years Yuma tour.

REMINDER

Remember gang; this meeting will mark the third meeting of the year, this meaning your dues are past due and payable. See Rosemary Baudino for details.

CONDENSER

Remember to keep abreast of all southern California 'A' doings. Just subscribe to the Condenser. See Les Scott at the meeting for details.

WINDOW HANDLES

Reproduction window cranks may be manufactured by two of our members, J. Dierberger and D. Meador. That is if the response is favorable. Dierberger says he will bring a sample to the meeting.

AIRCRAFT ENGINE?

Yes the model 'A' engine was once used in aircraft. This little 4 hole power plant called the Funk Engine, boasted overhead valves and dry sump lubrication system. (Since my notes on this subject are scanty, I invite any bygone day aircraft experts to step forward and donate some data)

GOOD NEWS

Young Ronnie Ferris, son of Activities Chairman Roland Ferris, is still progressing nicely after his serious operation

Sorry folks, Charley Down's supply of roadster pickups has finally been depleted. But keep watching your newsletter for any news concerning this vital matter.
