TECHNICAL TALK

by Dick Riha
556-4355

The June seminar was put on by Jon Heiland on buffing. This was the first project to be held in my new garage. In attendance were 14 men and 3 ladies. Jon showed how to take out deep scratches and bring the light bucket back to original luster. Jon also showed how to polish the headlight rim on the bucket. Another interesting thing that Jon showed was how parts must be buffed so that a good plating job can be obtained, and why there are differences in plating costs.

Also held on Sunday June 8 was a seminar on safety check of cars for the Summer Tour. The July Seminar will be held at my house and will be devoted to whatever problems you bring to the seminar.

TIP OF THE MONTH: You can avoid shifting into second from high if you raise the spark lever to retard the spark and then bring it down slowly as the speed picks up. A hill can easily be conquered when the spark lever is pushed up. Try it!
