## **MAINTENANCE SCHEDULE**

CHECK WITH EACH FUEL STOP	EVERY 1,000 MILES	( ) Check clutch pedal for 1"
		free play. Adjust if necessary
( ) Check crankcase oil level	( ) Perform 500 mile checks	( ) Check tail light lens
( ) Check radiator water level	( ) Test front wheel bearings	mounting screws
( ) Check water pump packing	for looseness	_
( ) Visual inspection of engine	( ) Oil generator bushings at	EVERY 2,000 MILES
	each end of generator	·
CHECK MONTHLY	( ) Tighten spring U-bolts, front	( ) Perform all 1,000 mile
( ) Check radiator water level	and rear	checks
( ) Check water pump for leaks	( ) Tighten all wheel lug nuts	( ) Lubricate in accordance with
and end play	(64 ft lbs)	2,000 mile Lubrication Chart
( ) Check water pump packing	( ) Test all lights	( ) Inspect starter commutator
( ) Inspect fan for cracks	( ) Inspect all cotter pins	and brushes
( ) Check carburetor and fuel	( ) Clean Light Switch and	( ) Examine tires for wear,
lines for leaks	wiring harness disc	cracks and damage
( ) Check battery water level	( ) Lubricate door hinges,	( ) Adjust Service Brakes
( ) Check tire pressure (34lbs)	striker plate, dovetails	( ) Inspect front leaf spring for
( ) Check tires for breaks,	( ) Inspect entire fuel system	sagging and cracks
cracks, and abnormal wear	for leaks	( ) Repack top end of shock
( ) Visually inspect engine	( ) Inspect Exhaust system for	links
( ) visually inspect engine	leaks	( ) Tighten differential banjo
EVERY 500 MILES	( ) Check manifold to exhaust	bolts (35 ft lbs)
202111 300 111123	clamp for tightness and seal	
( ) Lubricate in accordance		EVERY 5,000 MILES
( ) Lubricate in accordance	( ) Check steering wheel free	EVERY 5,000 MILES
with 500 mile Lubrication chart	( ) Check steering wheel free play (2 in. max)	
with 500 mile Lubrication chart ( ) Change crankcase oil	<ul><li>( ) Check steering wheel free play (2 in. max)</li><li>( ) Check specific gravity of</li></ul>	( ) Perform all 2,000 mile
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory	<ul><li>( ) Check steering wheel free play (2 in. max)</li><li>( ) Check specific gravity of battery fluid, charge if needed</li></ul>	( ) Perform all 2,000 mile checks
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings)	<ul> <li>( ) Check steering wheel free play (2 in. max)</li> <li>( ) Check specific gravity of battery fluid, charge if needed</li> <li>( ) Check for tight electrical</li> </ul>	( ) Perform all 2,000 mile checks ( ) Test engine compression
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for	<ul> <li>( ) Check steering wheel free play (2 in. max)</li> <li>( ) Check specific gravity of battery fluid, charge if needed</li> <li>( ) Check for tight electrical connections at all harness</li> </ul>	<ul> <li>( ) Perform all 2,000 mile checks</li> <li>( ) Test engine compression</li> <li>( ) Tighten rear wheel axle nuts</li> </ul>
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks	<ul> <li>( ) Check steering wheel free play (2 in. max)</li> <li>( ) Check specific gravity of battery fluid, charge if needed</li> <li>( ) Check for tight electrical connections at all harness connections.</li> </ul>	<ul> <li>( ) Perform all 2,000 mile checks</li> <li>( ) Test engine compression</li> <li>( ) Tighten rear wheel axle nuts</li> <li>(100 ft lbs)</li> </ul>
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment	<ul> <li>( ) Check steering wheel free play (2 in. max)</li> <li>( ) Check specific gravity of battery fluid, charge if needed</li> <li>( ) Check for tight electrical connections at all harness connections.</li> <li>( ) Check for tight coil</li> </ul>	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber	<ul> <li>( ) Check steering wheel free play (2 in. max)</li> <li>( ) Check specific gravity of battery fluid, charge if needed</li> <li>( ) Check for tight electrical connections at all harness connections.</li> <li>( ) Check for tight coil connections</li> </ul>	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging	<ul> <li>( ) Check steering wheel free play (2 in. max)</li> <li>( ) Check specific gravity of battery fluid, charge if needed</li> <li>( ) Check for tight electrical connections at all harness connections.</li> <li>( ) Check for tight coil connections</li> <li>( ) Check for tight connections</li> <li>( ) Check for tight connections</li> </ul>	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022)	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer cable
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and clamps, tighten battery ground	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and clamps, tighten battery ground connection	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer cable  EVERY 10,000 MILES
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and clamps, tighten battery ground connection ( ) Clean horn commutator	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer cable  EVERY 10,000 MILES ( ) Perform all 5,000 mile
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and clamps, tighten battery ground connection ( ) Clean horn commutator ( ) Drain fuel sediment bowl	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer cable  EVERY 10,000 MILES ( ) Perform all 5,000 mile checks
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and clamps, tighten battery ground connection ( ) Clean horn commutator	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer cable  EVERY 10,000 MILES  ( ) Perform all 5,000 mile checks ( ) Pull all brake drums, inspect
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and clamps, tighten battery ground connection ( ) Clean horn commutator ( ) Drain fuel sediment bowl	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer cable  EVERY 10,000 MILES  ( ) Perform all 5,000 mile checks ( ) Pull all brake drums, inspect brake linings, drum, and springs
with 500 mile Lubrication chart ( ) Change crankcase oil ( ) Tighten accessory mountings (windwings) ( ) Inspect radiator hoses for cracks/leaks ( ) Check fan belt adjustment ( ) Check wiper blade rubber ( ) Check generator charging rate, adjust as required ( ) Check carburetor and fuel	( ) Check steering wheel free play (2 in. max) ( ) Check specific gravity of battery fluid, charge if needed ( ) Check for tight electrical connections at all harness connections. ( ) Check for tight coil connections ( ) Check for tight connections at ammeter and terminal box ( ) Check distributor point gap (.018022) ( ) Clean battery posts and clamps, tighten battery ground connection ( ) Clean horn commutator ( ) Drain fuel sediment bowl	( ) Perform all 2,000 mile checks ( ) Test engine compression ( ) Tighten rear wheel axle nuts (100 ft lbs) ( ) Rotate tires ( ) Lubricate in accordance with 5,000 mile Lubrication Chart ( ) Flush cooling system ( ) Lubricate speedometer cable  EVERY 10,000 MILES  ( ) Perform all 5,000 mile checks ( ) Pull all brake drums, inspect
