

Model A Tools & Spare Parts

ORIGINAL TOOLS

13 tools included originally for the Model A:

1. Tool Bag A-17005 (B) Made from surplus top materials. Clips vary through production
2. Screwdriver A-17020. Wood handle with steel plaid that passes all the way through
3. Adjustable Wrench A-17021 Square end was for the differential oil drain plug
4. Spark Plug & Cylinder Nut Wrench. A-17017. Early cars had a thicker head nut end than after 9/28
5. Pliers
6. Open-End Wrench A-17015 7/16"x1/2"
7. Open-End Wrench A-17016 9/16"x5/8"
8. Grease Gun A-17125. Alamite Mfg Company
9. Jack A-17080 (-A, -B1, -B2, -B3, -C1, -C2, -C3). See judging standards. Includes corresponding handle (design of handle varies) with Jack and date of issue
10. Tire Iron A-17019. Carried over from the Model T. Some have square hole for adjusting brakes.
11. Starting Crank & Wheel Nut Wrench A-17036. There were 7 different cranks made for the Model A
12. Tire Pump A-17052. Carryover from the model T. There are several varieties as they were altered through production.
13. Owners Manual—Included with every car. There were 12 different publications as features of the Model A changed.
 - Oil Can (Included with early '28's through May '28) A-17040. A carryover from the Model T. Required for judging with early cars.
 - AA's had some variations to the tool list (Wheel nut wrench, Jack, Tire irons)
 - Popular accessory - Tire pressure gauge & pouch
